 Ireland.

MODEL CP-230hp

Features

- All stainless steel reservoir.
- Auto overheating controller.
- Adjustable thermostat that controls accurate temperature.
- Noiseless circuit in compressor.
- Air filter that protects water from contaminated air circulation
- Simple and Stylish LED display.
- Convenient foot adjuster
- Simple and Stylish LED display
- Hybrid coated steel repels rust.

Filtration

- Our filter removes undissolved particles such as dust, sand and rust from feed water and protects membrane filter from being clogged.
- Reduces Chlorine Taste and Odour.
- Reduces sediment down to 0.2 micron.
- Removes >99.99% of bacteria and Protozoane Cysts.
- Membrane filter is well suited to remove bacteria, clay particle, suspended metal hydroxides, colloidal silica, and other suspended materials, however, the containing minerals in water pass through UF-Membrane filter having a superior water purification capability.
- Bacteria Growth inhibitor incorporated.
